Weaving Applications into the Network Fabric
The Transformational Challenge

11-14 October 2010, Berlin, Germany

icin 2010

ICIN 2010 Call for Papers now available

The focus of **ICIN 2010** is on the networks, platforms and user devices becoming the apparently non-localised place where everything happens; new architectures and emerging business models have yet to mature to support different paradigms. Industry enthusiasm today focuses on mobile applications and application stores but will this model last? Will further transformations replace current trends? How will edge/core interaction, access evolution, and packet core evolution affect new services?

We invite prospective authors to submit extended abstracts to present at **ICIN 2010** in Berlin, Germany, October 11-14, 2010. Please visit our call for papers online at http://www.icin.biz/cfp or download the call for papers here.

The ICIN series of conferences brings together leading telecom and internet experts from industry, universities and government worldwide. ICIN operates on a rigorous peer review process and provides a unique impartial environment for open and honest technical dialogue in the area of intelligent communications services.

Submission deadline: 23 April 2010
Notification of paper acceptance by: 25 May 2010

You will find instructions and additional information on our web site at http://www.icin.biz.
If you have any questions on topics, content or the selection process, please contact cfp@icin.biz.

Best Regards

Stuart Sharrock, Chairman Max Michel, Chairman
ICIN International Advisory Board ICIN Technical Programme Committee
