Weaving Applications into the Network Fabric
The Transformational Challenge

11-14 October 2010, Berlin, Germany

Attend ICIN 2010 for insights on network applications
Early Bird Rates expire 1st September

The advance programme for the ICIN 2010 conference is available for download here. You can still benefit from the Early Bird Rate if you register soon.

ICIN 2010 addresses the technical and business issues raised by the challenge of creating sophisticated network applications. Such applications are formed by weaving together emerging network capabilities, computational power, network and customer data, and content in valuable new and different patterns. A challenge that is similar to that of creating rich new tapestries from an ever-changing array of materials, techniques and dyes.

In addition to a full conference programme of keynote presentations and technical papers, ICIN 2010 includes:

- Tutorials on **Identity Management** and on **Service Enablement Options in NGNs**
- The 2nd International workshop on **Business Models for Mobile Platforms**
- An interactive workshop on **Telecom Transformation** exploring a range of scenarios for the telecom industry in 2020
- Discounted rates at the Fuseco Forum

Register by 1 September to secure Early Bird discounts and preferential rates at the conference hotel.

For further information check the conference website at http://www.icin.biz.
