ICIN Conference Provides Hype-Free Information and Insights
Final programme now available

Join leading industry experts in Venice, Italy, October 14-16, 2013 for insights into the future of network services and applications.

NEW! Final programme now available. All papers presented at ICIN 2013 have been rigorously peer reviewed and were enthusiastically received as evidenced by comments from reviewers:

- This may be the best Service Architecture paper I have ever seen. Well written, insightful, and of broad interest. The results are very impressive and very informative.
- A deep, well-researched and interesting paper. The topic is of great relevance given recent activities, such as the network functions virtualization in ETSI.
- Great article on how WebRTC technology is used for real time communications, showing the opportunity and risk for the operators from an OTT perspective.
- An excellent paper, really innovative. I predict a very interesting discussion.
- A gem for ICIN. Most relevant and at the cutting edge. This is a thought provoking approach, which still in its formative stages, is undoubtedly of great interest to ICIN delegates.
- A very complete exposure on a future quite major topic.

Attend ICIN 2013 to discover why ICIN conferences are renowned for their debates on the impact of emerging technology, architecture and industry trends on intelligent communications services.

REGISTER NOW! if you are serious about services and want to hear the latest results and experiences from leading researchers and practitioners.

As the chairmen of the Technical Programme Committee and International Advisory Board, we look forward to welcoming you in Venice at ICIN 2013.
