

2013 17th International Conference on Intelligence in Next Generation Networks

Unlocking Value from the Networks

2013

Smarter Networks for Smarter Things 14-17 October 2013, Venice, Italy

ICIN 2013 approved by the IEEE Communications Society for technical co-sponsorship

[ICIN 2013](#) to be held on October 14-17, 2013, in Venice, Italy, is pleased to report the conference has been approved by the IEEE Communications Society for technical co-sponsorship. The ICIN 2013 conference proceedings will be published within the IEEE Conference Publications Program and individual papers will be indexed within the IEEE Xplore digital library.

ICIN is the home of international research of communication intelligence in advanced networks. ICIN has a long track record of shining a light on bright new (and brave) ideas. It is a place for a meeting of minds, where everyone contributes and everyone learns more. Please visit our call for papers online at <http://www.icin.co.uk/cfp> or download the call for papers [here](#).

Three worlds of research combine their effort in ICIN – academic schools of communication studies, vendors' product R&D and operators' advanced labs. This unique fusion in equal parts of scientific breakthrough, commercial practicability and operational feasibility is what makes ICIN such an engaging forum. Here, authors' ideas are reviewed against a wealth of Industry experience, ensuring that equal weight is given to blue-sky ideas as to their commercial potential. ICIN has always managed the impossible – to provide an independent platform for true professionals and thought leaders, while avoiding commercialism and competitiveness.

The primary focus of **ICIN 2013** is twofold, addressing both how to make networks smarter with a stream on the **transformation of Telcos' networks** and how to make smarter things with these networks with a stream on **the future of real-time communications**.

ICIN 2013 invites submissions of papers or demonstrations from telecom operators, internet service providers, over the top companies, content providers, web companies, user communities and developers as well as from established telecommunication and networking vendors or new companies in the ICT realm that contribute to the on-going discussion from their specific standpoint putting forward requirements, solutions and innovative perspectives whose focus is users and the fulfilment of their requirements.

Submissions should be made electronically through EDAS at <http://edas.info/N13971>.

Submission deadline: 13 April 2013

Notification of paper acceptance by: 4 June 2013

Final paper: 30 July 2013

You will find instructions and additional information on our web site at <http://www.icin.co.uk>.
