

March 2008 Press Release
18 March 2008

Call for Papers Now Open

Services, Enablers and Architectures Supporting Business Models for a New Open World

ICIN 2008 will bring together visionary ideas and perspectives on the application of intelligence in web and network technologies, from 20 to 23 October, at the Sofitel Hotel in Bordeaux, France.

ICIN 2008 will highlight future services, enablers and architectures that capitalize on the transition to an IP environment and lead to enhanced user expectations and experiences.

We invite prospective authors to submit an abstract for consideration. Please visit our call for papers online at <http://www.icin.biz/cfp.html> or download the PDF version [here](#).

Call For Papers submission deadline: 28 March 2008
Notification of paper acceptance by: 12 May 2008

"ICIN is a remarkable event. No other conference in telecommunications offers a comparable mix of insight and experience - delivered through the invited keynotes, the submitted presentations and by the delegates themselves," says Stuart Sharrock, Chairman of the ICIN International Advisory Board. "There are no sales pitches, marketing or commercial presentations at ICIN. It's a hype-free zone.

ICIN operates on a rigorous peer review process and provides a unique impartial environment for open and honest technical dialogue in the area of intelligent communications services. As the industry moves forward, cooperation or competition between these services will be debated, giving room for new business models and new players.

ICIN 2008 will be the twelfth in a series of international events which was initiated in 1989. These events have been highly successful and typically attract 250-500 delegates from around the globe: from network operators, service providers, equipment and software vendors, systems integrators, universities, corporate and governmental organisations.

ICIN is recognized as one of the world leading conferences in its domain and has a track record of attracting the leading experts from all sectors of the ICT industry with high quality presentations and discussions.
