26 - 29 October 2009

New Organiser for ICIN Events

Cheltenham, UK, 29 January 2009: Over the past 20 years, the ICIN series of conferences has become uniquely established as the industry forum which addresses intelligence in Information and Communications Technology (ICT). A separate company has now been created to oversee the interests of this industry forum.

ICIN Events Ltd will take over the organisation of ICIN from Adera, who managed the events until 2007, and NeuStar Secretariat Services, who organised ICIN 2008. ICIN Events Ltd is a not-for-profit company dedicated to supporting and developing the ICIN series of conferences and furthering the interests of the ICIN community.

The ICIN conference programmes are created by an independent committee of industry experts from papers submitted by leading strategists, engineers and researchers from industry, academia and government. A rigorous peer review process guarantees a cutting edge programme entirely free of hype. ICIN conferences have a track record of identifying key technology and service trends – and analysing their influence on business models – before they become widely recognised.

The focus of ICIN 2009 will be on new and emerging business models, technology and value chains based on communications networks and devices. How are telecoms operators planning to utilise the new capabilities in telecommunication networks and end-user devices? Will they end up with dumb pipes or smart pipes?

Prospective authors are invited to submit extended abstracts for consideration for **ICIN 2009**, October 26-29, 2009 in Bordeaux, France.

Submission deadline: 23 March 2009
Notification of paper acceptance: 5 May 2009

The Call for Papers is available online at http://www.icin.biz.

For additional information contact cfp@icin.biz.

Best Regards

Stuart Sharrock, Chairman   Dan Fahrman, Chairman
